JOURNAL

↑

- 16:02 repo-orch deferred #15 — blocked on history row
- 15:48 issue-orch.9 opened PR #14, awaiting CI
- 15:31 operator prioritise toml over graph
- 15:17 issue-orch.42 session died — no PR

4d 2h — no ticks

Sep 10 repo-orch started #42

journal... →

fix tick drift on long sessions

dead mid-flight — no live issue-orch, 3 commits, no PR. tick re-enters ~13m.

STATE

branch	issue-42 · 3 commits
idle	47m
labels	agent-ready, agent-working
PR	none
automergerge	on — set by repo (change)
issue-orch	idle · 2 prior runs

ACTIONS

kill

⏸

issue ↗

override the tick's recovery from a terminal:

```
cd ~/orch/wt/orch/42 && claude --resume a1b2c3d4
```
